

Recent articles on methane emissions published after and often in response to the Keppler et al. 2005 article, "Methane emissions from terrestrial plants under aerobic conditions".

Dueck, Tom A, Ries de Visser, Hendrik Poorter, Stefan Persijn, Antonie Gorissen, Willem de Visser, Ad Schapendonk, Jan Verhagen, Jan Snel, Frans J. M. Harren, Anthony K. Y. Ngai, Francel Verstappen, Harro Bouwmeester, Laurentius A. C. J. Voesenek and Adrie van der Werf. 2007. No evidence for substantial aerobic methane emission by terrestrial plants: a ^{13}C labelling approach. *The New Phytologist*. Published April 27, 2007.

Ferretti DF, Miller JB, White JWC, Lassey KR, Lowe DC, Etheridge DM. 2007. Stable isotopes provide revised global limits of aerobic methane emissions from plants. *Atmospheric Chemistry and Physics* 7: 237–241.

Lelieveld J. 2006. Climate change: a nasty surprise from the greenhouse. *Nature* 443: 405–406.

Kirschbaum MUF, Bruhn D, Etheridge DM, Evans JR, Farquhar GD, Gifford RM, Paul KI, Winters AJ. 2006. Comment of the quantitative significance of aerobic methane release by plants. *Functional Plant Biology* 33: 521–530.
